

EDMONTON POLICE SERVICE

REPORT TO THE EDMONTON POLICE COMMISSION

DATE:

2017 January 31

SUBJECT: Edmonton Police Service Control Tactics Statistics

2016 January - December Report

RECOMMENDATION:

That this report be received for information.

INTRODUCTION:

The Edmonton Police Service (EPS) submits two reports annually to the Edmonton Police Commission that outline all instances of reported use of force. One report provides a statistical summary of use of force events that occurred during the first half of the year and the second report provides a statistical summary of the entire year.

The information contained in this report was generated using statistical data captured from electronic Control Tactics Reports for occurrences with reported dates between 2016 Jan 01 and 2016 Dec 31. This report will also include a comparison of the current use of force data with previous data.

BACKGROUND:

The EPS captures use of force data through its electronic Control Tactics Reports. Control Tactics Reports are submitted after a police officer utilizes force where one or more of the following circumstances are present:

- 1. Injury resulting to any person;
- 2. Force used was higher than empty hand (soft) control, which is used for cooperative handcuffing;
- 3. Use of control tactics such as stunning techniques, direct mechanical techniques, chemical agents (O.C. spray), conducted energy weapon (CEW), control instruments, impact weapons, special impact munitions:
- 4. Firearm was drawn, displayed or pointed;
- 5. In the opinion of the investigating member and/or supervisor, unusual circumstances exist that necessitate the submission of the report.

COMMENTS/DISCUSSION:

There were 2292 control tactics occurrences in 2016, 5.0% lower than 2015. There were 4074 control tactics forms submitted in 2016 as compared to 4500 in 2015 a 9.5% decrease.

The reason that the number of Control Tactics Reports (in the chart below) are higher than the number of occurrences is due to the EPS policy requirement for every officer, involved in the use of force, to submit a Control Tactics Report. As well, more than one technique could be used at any one occurrence and different members on the scene may use different levels of force.

| Jan - Dec | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | Percentage Change 2015-2016 |
|----------------------------|------|------|------|------|------|------|------|-----------------------------------|
| Occurrences | 3077 | 1971 | 1964 | 2012 | 2074 | 2413 | 2292 | -5.0% |
| Control Tactics Reports | 6046 | 3453 | 3527 | 3687 | 3488 | 4500 | 4074 | -9.5% |

In late 2010, the EPS recognized that the need for engaged supervision is a critical link in the Reasonable Officer Response process and implemented a service wide system to ensure supervisory oversight and review of all reportable use of force events. This process divided use of force events into two categories for review. Generally, Category I reviews involve reportable uses of force of a minor nature and Category II reviews are those involving a higher level or those circumstances where a supervisor decides a Category II review may be warranted.

Note: The data from incidents that require a 46.1 notification to the Director of Law Enforcement, which get assigned to the Alberta Serious Incident Response Team (ASIRT), do not form part of this report.

Comparative Analysis of Category I and Category II Occurrences

| Occurrences | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | Change 2015- 2016 |
|------------------------|-------|-------|-------|-------|-------|-------|-------|-------------------------|
| Category I | 1592 | 1051 | 1057 | 1073 | 1177 | 1469 | 1369 | -6.8% |
| Category II | 1485 | 920 | 907 | 939 | 897 | 944 | 943 | -0.1% |
| Category II % of Total | 48.3% | 46.7% | 46.2% | 46.7% | 43.2% | 39.1% | 40.8% | 1.7% |

Comparative Analysis of Category I and Category II Control Tactics Reports

| Control Tactics Reports | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | Change 2015- 2016 |
|----------------------------|-------|-------|-------|-------|-------|-------|-------|-------------------------|
| Category I | 3871 | 2141 | 2250 | 2363 | 2210 | 3120 | 2677 | -14.2% |
| Category II | 2175 | 1312 | 1277 | 1324 | 1278 | 1380 | 1397 | 1.2% |
| Category II % of Total | 36.0% | 38.0% | 36.2% | 35.9% | 36.6% | 30.7% | 34.3% | 3.6% |

The tables above show that the majority of Occurrences are Category I occurrences which consist of displays of force, (Canine Presence ,CEW Presence or Firearms Low Ready) and the lowest levels of hands on control such as holding/escort positions and joint locks. They also show that 66.7% of Control Tactics Reports in 2016 did not rise above the threshold for a Category I review.

In 2016 the number of reportable use of force occurrences decreased by 5% and the number of Control Tactics Reports decreased by 9.5%. By grouping use of force events into Category I and Category II we can see that the number of Category II occurrences has remained constant in 2016 compared to 2015

.CONCLUSION:

The EPS introduced Reasonable Officer Response to assist in providing a professional and defensible use of force framework. This is premised on basing the use of force on the standard of "objective reasonableness" and includes a supporting foundation based upon:

- 1. Lawful and professional presence,
- 2. Tactical communications, and
- 3. Tactical considerations.

EPS recognized that the need for engaged supervision involving use of force events is critical. Supervisory reviews are a requisite step in the Reasonable Officer Response process; further, they provide guidance and mentorship to the membership. This resulted in the implementation of service wide protocols following all EPS reportable use of force events which included professional awareness, thorough reporting and supervisory oversight review.

ADDITIONAL INFORMATION ATTACHED:

This report contains the following attachments:

- Attachment 1 Comparison of the various control tactics that were utilized (2015 vs. 2016);
- Attachment 2 Table depicting the ascending order of the control tactics utilized
- Attachment 3 The top ten CAD event types where force was used and the top ten EPS event types where force was used;
- Attachment 4 A quarterly comparison of CTR occurrences and reports in 2016;
- Attachment 5 A monthly comparison depicting the geographical location of the various control tactics occurrences. This is a comparison of the geographical location of the use of force and is not a reflection of the use of force by individual Divisions, Sections, Units, etc;
- Attachment 6 A quarterly comparison of the of the control tactics utilized over the last 6 years.

Geographic Division: City Wide District: All Districts
Report Type: Person and Tactical Entry Team

Based on Occurrence Reported Date

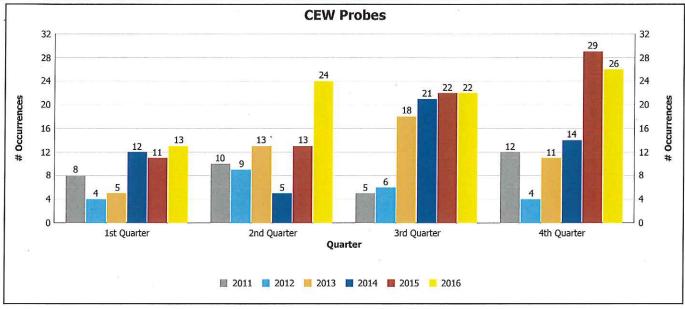

"CEW" refers to the TASER X26 the current model that the Edmonton Police Service issues: CEW is classified as an Intermediate Weapon

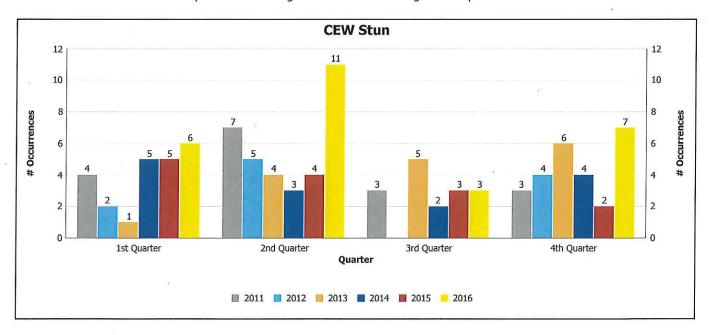

[&]quot;Presence/Laser" refers to when the CEW is removed from the holster and displayed either by mere presence, or with the laser sight activated and pointed at a subject (no actual deployment of the weapon occurs in this fashion).

Report Source: EPROS Control Tactics Run By: Larry Snidal

"Probes" refers to when 2 barbed probes are discharged from the CEW cartridge at a suspect.

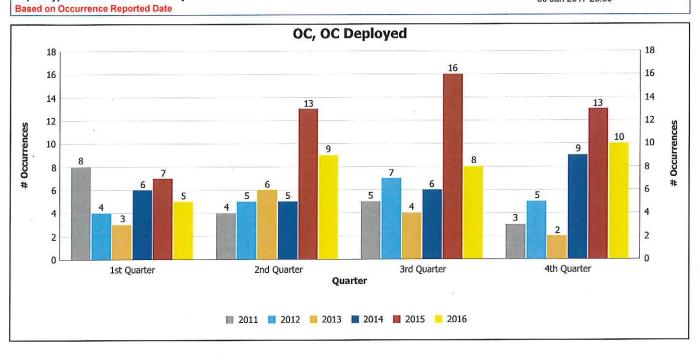

"Stun" refers to when the CEW is deployed directly against the subject as a pain compliance technique.

This also encompasses a situation where there may be more than one deployment (ie. Presence is ineffective, with Probes subsequently deployed).
